## Grand Piano

Ritmüller pianos were originally produced in Germany where they established a reputation for innovation and quality that began in 1795. Today the brand is proudly manufactured in Guangzhou, China with a dedication to craftsmanship and state-of-the-art design that reflects both its aristocratic tradition and future-focused commitment to the latest in design & music technology.

Ritmüller pianos are built in the world's largest piano manufacturing center which was the first piano factory in China to be awarded the distinguished ISO 9001 Certification for Quality Control Systems and was also recently awarded ISO 14001 for Environmental Management System compliance.

*Ritmüller*  
Since - 1795

Created by master piano designer, Lothar Thomma, this spectacular grand piano incorporates the very latest in music design and technology. Re-engineered with quality components, the unusual shape of the rim of this grand piano allows expansion of the soundboard area producing a performance quality tone. This model has become the choice of many teachers and performers where space is a limiting factor.
